## English

### LO: To generate noun phrases

This term, we are going to be looking at a new topic in English and a new novel. How exciting! However, I am not telling you what novel it is until tomorrow as I want to see how critical you can be about your thinking beforehand.

First of all, I would like you to watch the following [video link](#) all about a woman who finds different treasures in a dump (tip).

Then what I would like you to do is have a look at the powerpoint on our class page labelled dustbin. What different images can you see? Think about how you would describe these!

I then would like you to have a look at the video I have posted on the class page (after registration this morning) discussing and recapping what adjectives, noun phrases and expanded noun phrases are.

Finally, I would like you to look at the four images below (you could print these out or draw them in your books) and I would like you to create adjectives, noun phrases and expanded noun phrases about these images.

## Spelling

### LO: To learn about contractions

Today in spelling, we are going to be looking at what a contraction is.

Contractions are when you have two words and you join them together by using an apostrophe. You can use apostrophes to show that you have **omitted** (left out) some letters when you are joining words together.

For example, you can join the words 'you' and 'are' together. You + are = you're. The apostrophe takes the place of the removed letters. In this example, the letter a.

Sometimes, however, you need to **rearrange** the letters a bit when you contract the words. For example: will + not = won't.

Please click on the [video link](#) to explore what a contraction is and why an apostrophe is used.

Below is an activity I would like you to do, by matching the original words to the contractions. You could print this out or you could create your own little domino cards with the same words and match them altogether.

<b>cannot</b>		<b>hasn't</b>
---------------	--	---------------

<b>has not</b>		<b>it's</b>
----------------	--	-------------

<b>it is</b>		<b>couldn't</b>
--------------	--	-----------------

<b>could not</b>		<b>didn't</b>
------------------	--	---------------

<b>did not</b>		<b>I'll</b>
----------------	--	-------------

<b>I will</b>		<b>can't</b>
---------------	--	--------------

### Quick Maths

This time, we are going to be carrying out some quick maths based on our times tables, meaning that the questions are to be answered with speed. On our Class Page, there is a powerpoint called Quick Maths. On that powerpoint, there are questions for this week's learning. Have a go and then you can go onto the next slide and see if you have got the questions right!

### Maths

#### LO: To add and subtract mentally

This week in Maths, we are going to be looking about our place value, as well as addition and subtraction.

The first thing I would like you to do is write a 3 digit number on a piece of paper, e.g. 384. Next, I would like you to write:

\*How many tens it has...

\*How many hundreds it has...

\*How many ones it has...

I would then like you to watch the video I have uploaded to ClassDojo discussing how we can work out different additions and subtractions by using the column method.

Below there are our steps to success that we use in class. Please start where you feel comfortable and work on from there. You **DO NOT** need to complete all the questions, but make sure it does challenge you!

<u>Step One</u>	<u>Step Two</u>	<u>Step Three</u>
74 + 5	182 + 7	274 + 15
29 - 6	295 - 4	195 - 34
83 - 3	462 + 5	445 + 54
41 + 8	899 - 7	603 + 26
32 + 6	751 + 8	727 + 72
97 - 4	395 - 4	999 - 378

## PE

LO: To learn how to keep our brains active

It is super important at a time like this, when we are at home for the majority of the time, to keep fit, healthy and keep our brains active.

Today, I would like you to take part in a few of our class favourite dances to keep our brains active. The links are below:

[Minion workout](#)
