

L.O. to calculate angles in degrees

Find the Missing Angles

Find the missing angles.

Example:

The missing angle is:

$$88 - 58 = 30^\circ$$

1.

The missing angle is:

2.

The missing angle is:

3.

The missing angle is:

4.

The missing angle is:

Write your answers: The missing angle is $90^\circ - 34^\circ = 56^\circ$

Don't try to draw the angles unless you have a protractor.

Hint: opposite angles are equal.

one whole turn = 360°

Calculate and label the size of all the angles where each pair of lines intersect.
