

Staying in the house

At the moment,

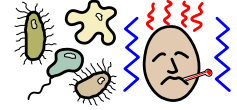

there is a bug going round.

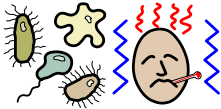

It's

called

Corona Virus.

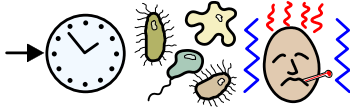

Corona Virus can make

people

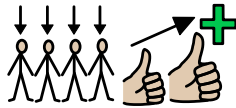

poorly.

Until the bug

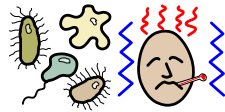

has gone away,

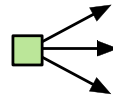

we need to try to keep everyone healthy.

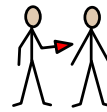

To try to stop

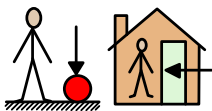

the bug

spreading,

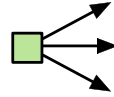

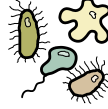

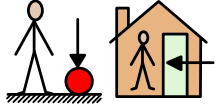

you need to

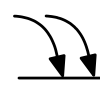

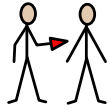

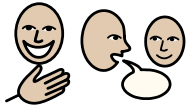

stay inside the house.

You won't be able to go outside or in the car or bus.

Staying inside will help to stop germs spreading.

Staff will tell you you when going outside is OK again.

If you have any questions, you can ask staff.
