

Home learning – Tuesday 2nd February 2021

Hi Year 5,

Don't forget to get cracking (!) on Reading Eggspress. Just get logged in and you will find **over 2500 online books free books**. There are also **online literacy activities and games** and you can **compete against other students, earn more rewards, and continue improving your reading skills**.

This is our timetable for today's home learning:

Guided Reading:

L.O. to infer characters' feelings and thoughts

Listen and read along with Chapter 10

I - How did Bradley **twist** his and Carla's conversations to Jeff?

"She's we-ird!" he replied. "She likes to eat dog food!"

Bradley nodded. "She asked me why the President doesn't wear a hat! How am I supposed to know that?"

These ideas might help you answer the question.

Think about them:

Did Carla say these things?

Who did say these things?

Why did Bradley tell Jeff these lies? What was he trying to persuade Jeff to think?

Now answer the question: **How did Bradley twist his conversation with Carla to Jeff?**

R - What does Bradley suggest doing next time the girls say hi?

Please remember:

V = vocabulary

I = infer - use the information from the text to make your own decision about something, use PEE to answer these questions:

Point (say what you think),

Evidence (find words from the text which prove what you think),

Explain (explain why the words from the text made you think what you did).

P = Predict - what do you think will happen next. You must have a good reason! Don't forget to explain your prediction using PEE.

E = Explain - explain a characters actions or explain your choices or thoughts.

R = retrieve (find) information

S = say what has happened in a small number of words. Choose the most important parts, leave the rest out.

Spelling, Handwriting and Grammar

Practice your **handwriting** using the Year 5 spelling sheet. (Lots easier than yesterday!)

English

L.O. to read texts that are structured in different ways.

Today we are going to read a very short play and I want you to write it out leaving lots of space at either side so that you can annotate it.

WHHAATTT – well, you need to watch the video to find out what annotate means!

Maths

L.O. to multiply 3 digit numbers by 1 digit numbers

Watch the video carefully – we are slowly going to build up our multiplication skills this week until we can multiply 3 digits by 2 digits and 4 digits by 1 digit. Today we are starting off by reminding ourselves of what we already know.

There are 2 different worksheets – one the whole class and a purple one for those who want to push themselves..

You can choose which you do. I would be really pleased to see you pushing yourself. 😊

Arithmetic

<https://trockstars.com/>

Click the link above to play TTRock Stars. Send me a picture of your super high score!!

Science

L.O. to explore materials which dissolve and find out if this is a reversible change.

Follow the instructions on the sheet carefully (you will need quite a lot of salt so someone might need to pop to the shop for you!)

You are going to find out whether salt dissolves in water and then ... whether it is possible to get the salt back again.

Things to think about:

Where do you think the salt has gone when it dissolves into the water?

What does dissolve mean? Can you still see the grains of rice.

What happens when the water evaporates?
